1. Scope

The scope of this exploratory testing session includes verification of the website's core e-commerce functionalities and basic non-functional aspects.

Functional Testing Scope:

1. User Account Operations: Registration, Login, Logout, Forgot/Reset Password.
2. Product & Cart Operations: Product listing, search, category and brand filtering, add to cart, view cart, remove products, and quantity verification.
3. Order Management: Checkout flow, order placement, and invoice download.
4. Subscription and Contact: Home page and cart page subscription fields, and contact form submission.

Non-Functional Testing Scope:

1. UI/UX Observations: Page alignment, image layout, and banner behavior.
2. Security Gaps: Weak password acceptance, fake email acceptance, auto-fill after logout
3. Cross-Browser Behavior: Testing performed on Chrome, Firefox, and Edge.

Out-of-scope items include admin panel access, backend database/API performance, and payment gateway integration beyond input validation.

2. Test Environment & Tools

URL: <https://automationexercise.com>

Browsers: Chrome (Tester 1,2), Firefox (Tester 2), Edge (Tester 3)

Devices Used: Laptop/Desktop

Test Duration: 3 days

Test Team: Group 02

Testers Involved:

- **Umm E Hani** – Edge
- **Elsa Soomro** – Chrome
- **Fatima Zehra** – Firefox
- **Syeda Safoora** – Chrome

3. Official Test Cases

Test Case ID	Inputs Action	Expected Result	Actual Result	Status	Positive/Negative	Functional/Non-Functional	Browser Tested
TC001	Register User	Account should be created	Account is created and show successful message	Pass	Positive	Functional	Chrome
TC002	Login User with correct Email and Password	User should be Logged in and redirected to Home	User is Logged in and redirected to Home page	Pass	Positive	Functional	Chrome
TC003	Login User with incorrect Email and Password	Error Message should appear like "Invalid Email or Password"	Error Message appears "Your Email or Password is incorrect"	Pass	Negative	Functional	Chrome
TC004	Logout User	User should be Logged out and see Login/Signup Page	It logged out and shows Login/Signup Page	Pass	Positive	Functional	Chrome
TC005	Register User with existing Email	Error message should appear "Email Address already exist"	Error message appears "Email address already exist"	Pass	Negative	Functional	Chrome
TC006	Contact Us Form	Success message should appear	Success Message appears "Your details have been submitted successfully"	Pass	Positive	Functional	Chrome
TC007	Verify Test Cases Page	User should be navigated to the Test Cases page successfully	User is navigated to the Test Cases page successfully	Pass	Positive	Functional	Edge
TC008	Verify All Products and product detail page	All product details should be visible; review section should validate	All product details visible; review section	Pass (for product detail), Minor issue in email validation in	Positive	Functional	Edge

		proper email format	allows invalid email like hani123@gmail	review section			
TC009	Search Product	Relevant product(s) matching the keyword should be displayed in the search results	Products related to entered valid keyword are displayed correctly	Pass	Positive	Functional	Edge
TC010	Verify Subscription in home page	Subscription success message 'You have been successfully subscribed!' should appear only when a valid email is entered	Success message appears; however, input field accepts incomplete/invalid email format like hani123@gmail without validation	Partial Pass — Subscription works, but validation is missing for email format	Positive	Functional	Edge
TC011	Verify Subscription in Cart page	Subscription success message 'You have been successfully subscribed!' should appear only when a valid email is entered	Success message appears; however, input field accepts incomplete/invalid email format like hani123@gmail without validation	Partial Pass — Subscription works, but validation is missing for email format	Positive	Functional	Edge
TC012	Add Products in Cart	Both products should appear in the cart with correct name, price, quantity, and total calculation	Both products added successfully with correct price, quantity, and total price visible	Pass	Positive	Functional	Edge
TC013	Verify Product quantity in Cart	Product should be displayed in cart with the	Product added to cart successfully	Pass	Positive	Functional	Edge

		same quantity selected	with correct quantity displayed				
TC014	Add product to cart → Proceed to checkout → Register during checkout	User should be able to register and complete order successfully	Order placed successfully, invoice auto-downloaded.	Pass	Positive	Functional	Firefox
TC015	Register first → Login → Add product to cart → Proceed to checkout	User should be able to place order successfully as registered user	Order placed successfully, invoice auto-downloaded.	Pass	Positive	Functional	Firefox
TC016	Login with existing account → Add product to cart → Proceed to checkout	Order should complete successfully for existing account.	Order placed successfully, invoice auto-downloaded.	Pass	Positive	Functional	Firefox
TC017	Add product to cart → Remove product from cart	Product should be deleted	Product removed successfully.	Pass	Positive	Functional	Firefox
TC018	Select a category from left sidebar	Only products of selected category should be displayed	Products of selected category displayed correctly.	Pass	Positive	Functional	Firefox
TC019	Select a brand from left sidebar	Only products of selected brand should be displayed	Products of selected brand displayed correctly.	Pass	Positive	Functional	Firefox
TC020	Search a product + Add to cart + Login	Cart should retain added items after login	Cart items retained	Pass	Positive	Functional	Chrome
TC021	Open product + Fill review form + Submit	Review submitted and visible	Review submitted successfully	Pass	Positive	Functional	Chrome

TC022	Enter email in footer subscription + Submit	Subscription success message shown	Subscription successful	Pass	Positive	Functional	Chrome
TC023	Login + Subscribe from footer	Subscription message displayed	Message appeared after login	Pass	Positive	Functional	Chrome
TC024	Add multiple products + View cart	All products correctly shown in cart	Multiple items listed as added	Pass	Positive	Functional	Chrome
TC025	Login + Logout	User redirected to login/signup page	Logout successful and redirected	Pass	Positive	Functional	Chrome
TC026	Click Scroll Down arrow	Page scrolls to bottom smoothly	Page scrolled to bottom	Pass	Positive	Functional	Chrome
TC027	Delete Account	Should delete the account	Deletes the account with a success message	Pass	Positive	Functional	Chrome
TC028	Login with the account that was deleted	Should show message account or Email does not exits	Shows message "Email or password is incorrect"	Pass	Negative	Functional	Chrome

TC029	Search with Exact Product name like "Blue Top"	Should show that specific product	Shows the exact product searched	Pass	Positive	Functional	Chrome
TC030	Enter invalid product name or random keyword	Should not show any product	Shows empty product page	Pass	Negative	Functional	Chrome
TC031	Register with Invalid Email Format	Error: "Invalid email format."	Registration continues or shows next page instead of blocking invalid email	Fail (Validation Missing)	Negative	Functional	Chrome
TC032	Home Page Load Time	Page should load within 2-3 seconds	Page load within 2-3 seconds	Pass	Positive	Non-Functional	Chrome
TC033	Open site on mobile and tablet view	Layout should adapt; no element should overlap or break	Layout is adapt; no element should overlap or break	Pass	Positive	Non-Functional	Chrome
TC034	Navigate using Tab key or screen reader	All elements should be focusable and accessible via keyboard navigation	Keyboard navigation stops after email field; unable to reach password input	Fail	Positive	Non-Functional	Chrome
TC035	Checkout with Empty Cart	Show a message like "Cart is empty" OR disable/hide checkout option	Proceed to Checkout button is not visible when cart is empty	Pass	Negative	Functional	Chrome
TC036	Submit Empty Contact Form	Validation errors should appear for all required fields (name, email, subject, message)	Only the email field is validated. After entering email, the form is submitted without validating others	Fail	Negative	Functional	Chrome

4. SMOKE Test

After each build or major action, the following core functionalities were verified:

1. User can successfully Register & Login.
2. Product Search & View pages load correctly.
3. Add to Cart and View Cart works without crash.
4. Checkout & Place Order flow completes successfully.
5. Home Page and Navigation load without performance issues.

5. Defect Log

Defect ID	Related Test Case	Description	Severity	Steps-to Reproduce	Status	Functional/non-Functional, Positive/Negative	Browser
D001	TC014/TC015/TC016	Registration form accepts weak passwords like "123"	High	Register new account with "123" as Password -> Account Created .	Open	Functional , Negative	Firefox
D002	TC014/TC015	Registration form accepts gibberish data and half-filled form	Critical	Leave half fields blank + enter random letters->Account created	Open	Functional / Negative	Firefox
D003	TC014/TC015/TC016	Browser autofills credentials after logout even when user didn't save them	Critical	Login → Logout → Refresh login page → Fields auto-filled	Open	Functional / Negative	Firefox
D004	TC014/TC015/TC016	Checkout accepts invalid credit card details and still processes order	Critical	Add product → Checkout → Enter random card → Place Order	Open	Functional / Negative	Firefox
D005	TC015	View Cart page layout breaks – images and details not symmetrical, some elements overlap	Medium	Add products → View Cart → Observe layout alignment	Open	Non-Functional (UI/UX) / Negative	Firefox

D006	TC018	Category view correct, but Big Sale 50% Off banner is non-clickable and no discounted prices shown	Medium	Go to Products → Click banner or check product price	Open	Functional / Negative	FireFox
D007	TC019	Brand product view works, but brand filter is limited (UX enhancement)	Low	Select any brand → Only few products visible, no "View all" option	Open	Functional / Negative	FireFox
D008	TC036	Contact form allows submission when required fields (name, subject, message) are left empty; only email field is validated	Medium	Contact Us page -> Enter only email -> Click Submit	Open	Functional / Negative	Chrome
D009	TC035	Proceed to Checkout button is hidden when cart is empty instead of showing a message	low	Open site -> Ensure cart is empty -> Click on Cart -> button not visible	Closed	Functional / Negative	Chrome
D010	TC030	No validation or message displayed for invalid/random product search	Low	Products-> Enter random keyword search bar-> Press Search->Pag	Closed	Functional / Negative	Chrome

				e shows no product, but no message like No products found			
D0011	TC031	Registration form accepts invalid email format like hani123@gmail without showing error	Medium	Go to Signup/Login->Enter name and invalid email->Click Signup->No email format validation — proceeds to next step	Opened	Functional / Negative	Chrome

6. Conclusion

Exploratory testing of the Automation Exercise website was conducted by our team across multiple browsers (Chrome, Firefox, and Edge) to evaluate both functional and non-functional aspects of the application.

Our testing successfully verified major flows including registration, login, product search, cart operations, checkout, and subscriptions.

During testing, we discovered several critical defects including weak input validations, acceptance of fake/non-existent emails, missing password reset features, UI alignment issues on the cart page, and banners that were non-clickable.

Overall, the application functions for basic e-commerce tasks, but multiple validation, security, and UX improvements are required to make it production-ready.

7. Suggestions

1. Strengthen form validations (emails, passwords, contact details).
2. Implement account security (Captcha, account lock on multiple failed attempts, mandatory reset/forgot password option).
3. Fix UI/UX alignment issues in cart and responsive layouts.
4. Ensure banners & promotional features are functional and properly linked.
5. Enhance brand and category filters to show complete product listings.
